

**Short Pitch:** AS400191 is the autonomous system for Indent Solutions. The ASN will provide as a basis for research and development relating to network engineering.

**Long Pitch:** AS400191 is a pet project of mine. This will allow for publication of my own personal projects relating to network engineering and network design. Indent Solutions is the owner of AS400191, and with it's resources we will be able to analyze global routing patterns in order to better predict them in the future.

**Personas:**

IT Engineer 1 – working professional interested in viewing the research published by the website.

Corporate Client – medium sized business operating large network infrastructure. Interested viewing my projects for potential job offers.
